

1 The applicant submits that DeVito fails to teach or suggest a remote interface where  
2 information is specified for an individual and a server that generates a script program based on  
3 the specified information. DeVito discloses the ability to interact using a physiological sensor  
4 with various electronic media such as video games, movies, music, virtual reality, and computer  
5 animations. Some of these, such as video games, provide scripted scenarios that the user  
6 responds to. Applicant submits that although this appears to disclose the components b-d of  
7 twice amended Claim 1, DeVito fails to include a remote interface for specifying information  
8 for the individual, wherein the server being coupled to the remote interface over a  
9 communications network generates the script program according to the specified information  
10 for the individual. Therefore, twice amended independent Claim 1 is allowable over the cited  
11 prior art. Since Claims 2 and 4-12 depend from Claim 1, they are allowable for the same  
12 reasons that make Claim 1 allowable.

13 CONCLUSION

14 If the Examiner has questions or wishes to discuss any aspect of the case, the Examiner  
15 is encouraged to contact the undersigned at the telephone number given below.

16 Respectfully submitted,
